Issue/page

TM applications and technology

ner Haendel — **Europe and the information society** 1/10
A reality or merely a catch phrase in the battle of visions?

lfgang Fischer, mas Rambold, mas Theimer — **Internet and ATM** 1/34
Prospects for the Internet of the future as it integrates ATM capabilities

ne Schmiederer-Vollmer — **Porsche chooses the fast lane** 3/28
Telekom's Datex-M network lets the sports car manufacturer accelerate engineering and productions processes

rview with stoph Guembel sche AG) and mann Boehm (IBD) — **A major competitive factor for us** 3/30

oadband applications and technology

ner Haendel — **Europe and the information society** 1/10
A reality or merely a catch phrase in the battle of visions?

hrich Armbruester — **The challenge of video and multimedia to public networks** 1/30
Diversifying applications will increase demands on network solutions

reas Lahr — **Choosing the right multimedia strategy** 1/40
Siemens IMMXpress products can help network operators tap into the market for multimedia applications

s Rosenthal — **Making sense of multimedia** 2/8
Weighing the benefits of multimedia applications for businesses

e Schmiederer-Vollmer — **Porsche chooses the fast lane** 3/28
Deutsche Telekom's Datex-M network lets the sports car manufacturer accelerate engineering and productions processes

view with stoph Guembel sche AG) and mann Boehm (IBD) — **A major competitive factor for us** 3/30

r Bruckboeck, nut Stocker, Ash — **SDH – step by STEP** 3/38
Siemens, GPT and Italtel map out a strategy for SDH network evolution

olf Kuechler, n Zoberbier — **Forging the link** 3/40
DAVIC unveils its technology platform for global system combatibility in interactive multimedia services and applications

r Auer, z-Werner Ramke — **Beefing up the access network** 4/43
Upgrading access networks for broadband applications now costs far less thanks to XpressLink D

Issue/page

Communication Terminals

Product review — **Set for success** 1/49
Attractive products for the workplace or the home

Interview with John Kuhn — **Optiset makes its launch** 2/38
Interview with the telecommunications manager of NASA Kennedy Space Center

Alfred Jahn — **Keeping flexible** 2/42
Hicom cordless telephones allow flexibility and offer a host of features

Communications test equipment

Semih Acanal — **ISDN basic rate interface on the test bench** 1/47
The K1405 ISDN S0 simulator/monitor generates and analyzes behavior of terminals and network terminations and tests Level 1 measuring equipment

Guenter Heinzmann — **Finding faults fast** 2/21
Automatic digital test system ATME 2 dig optimizes international network of Telintar S.A. in Buenos Aires

Todd Hudson — **Fine-tuned for cable TV** 2/51
Introducing an optical power meter ideally suited for analog measurements

Hans Werner Arweiler — **Dynamic duo** 3/48
Siemens' impairment generator module and K4501 ATM analyzer simulate and detect ATM transmission errors

Volker Fleckenstein, Ulrich Huber — **Hardware testing fine tuned** 4/40
New state-of-the-art diagnostic software is speeding up the development and manufacturing of hardware systems while cutting costs

Gerhard Voss — **A steady contact** 4/47
The K3000 ISDN service puts the S/T interface to the test

Klaus Krause — **Keeping ISDN lines in shape** 5/44
Locating and measuring faults on ISDN subscriber lines is a snap with Siemens K1404 ISDN-U analyzer

Computer-supported telecommunication applications

Clemens Hauber, Kurt Distler, Ruediger Hnyk — **Streamlined design** 4/27
SMAC project shows European car companies the benefits of multimedia collaborative working

Data networking

Orna Berry, Thomas Hornung — **New routes to the local area network market** 1/7
Siemens and Ornet join forces to offer powerful LAN solutions

Interview with Orna Berry — **"The people, their vision, the technology"** 1/8

Ruediger Hnyk — **Passport to global communications** 1/38
SMDS the key to worldwide high-speed and economical data communications

Mario Rauseo — **Turning up the volume** 2/25
Siemens' SIMUX multiplexer boosts Movilnet's capacity in Venezuela

Interview with Movilnet's Wade Keener — **"The backbone of operational support systems"** 2/26

Sepp Tietze — **Building intelligence** 2/36
Office complex in Singapore offers tenants high-tech, low-cost communication services

Joern Schuett — **Switching to personal communications** 2/44
Combined switching center lets users take advantage of both mobile and wireline systems

Rudolf Sammueller — **Data on the move** 3/32
Big improvement in data transmission between HQ and employees in the field

Klaus Rosenthal — **Toward an integrated communications center** 5/6
Future communications systems must link heterogeneous technologies in an open system

Werner Meyer — **Hungary makes the drive for digital** 5/20
SIMUX mutiplexers link a nationwide digital network as it unfolds

Enterprise networking

Orna Berry
Thomas Hornung — **New routes to the local area network market** 1/7
Siemens and Ornet join forces to offer powerful LAN solutions

Interview with Orna Berry — **"The people, their vision, the technology"** 1/8

Ruediger Hnyk — **Passport to global communications** 1/38
SMDS the key to worldwide high-speed and economical data communications

Eduardo Santin — **ISDN olé !** 2/30
SmithKline Beecham builds first ISDN link between US and Mexico using Hicom

Christian Teickner — **Network results for Linotype-Hell** 2/40
Corporate network from Siemens helps the company improve efficiency and cut communications costs

Joern Schuett — **Switching to personal communications** 2/44
Combined switching center lets users take advantage of both mobile and wireline systems

Interview with Van Cullens — **Ready for the 46-day year** 3/6
New Siemens Business Unit providing global solutions for the rapidly changing Internet

Fiber-optic technology and applications

Semih Acanal — **ISDN basic rate interface on the test bench** 1/47
The K1405 ISDN S0 simulator/monitor generates and analyzes behavior of terminals and network terminations and tests Level 1 measuring equipment

Interview with John Kuhn — **Optiset makes its launch** 2/38
Interview with the telecommunications manager of NASA Kennedy Space Center

Lother Finzel — **Flex-time for networks** 4/34
Redundant ring networks let fiber-optic network operators reallocate resources without interrupting service

Stephan Kirchmann — **The glass office** 4/36
Advances in technology and standards are combining to accelerate the spread of fiber-to-the-desk

Peter Schade — **Greater bandwidth, lower cost** 5/
FastLink introduces fiber optic links into the access network alongside existing copper cables

ISDN

Ivan Khan — **Germany's CNI teams up with Siemens** 1/
The alternative operator supports Siemens projects with comprehensive voice and data services that offer efficier communications solutions

Georg Rozinsky — **Casting the net** 1/
Bulgaria building GSM digital cellular network to speed th expansion and modernization of its telecommunications

Roberto de Lima
Wolfram Werther — **What do you call ISDN in Portuguese?** 2/
Siemens sets the pace in digitizing Brazil's telephone network

J. Roberto Ortense — **Brazil's award-winning Hicom** 2/
World's largest Hicom 300 system supports São Paulo office complex

Mario Rauseo — **Turning up the volume** 2/
Siemens' SIMUX multiplexer boosts Movilnet's capacity in Venezuela

Interview with Movilnet's Wade Keener — **"The backbone of operational support systems"** 2/

Eduardo Santin — **ISDN olé !** 2/
SmithKline Beecham builds first ISDN link between US and Mexico using Hicom

Alfred Jahn — **Keeping flexible** 2/
Hicom cordless telephones allow flexibility and offer a host of features

Joern Schuett — **Switching to personal communications** 2/
Combined switching center lets users take advantage of both mobile and wireline systems

Mobile communications

Peter Berwing — **DECT poised for the public network** 3
The specification and implementation of the new uniform multi-vendor DECT air interface has been given crucial support by Siemens

Gerhard Lechner — **Mobilizing customers** 3/
Siemens Programs and Systems Engineering Group specializes in advising small clients on GSM

Editorial — **Getting unwired** 5
Siemens gears up wireless presence in North America

Interview with Bob Hunsberger — **"Going after the emerging markets"** 5

Klaus Maler — **Pronto!** 5/
Italy leads the way with state-of-the-art DECT phone service

Daniel Felicio — **A non-repeatered achievement** 5/
Introducing the latest addition to Siemens' family of fiber-optic submarine cables

Nicola Bonzanino — **New radio solutions for new network operators** 5/
With microwave radio tecnologies, mobile operators are bypassing fixed-line networks

Kurt Wagenlehn1er — **Mobility made simple** 5/
The futuristic-looking S6 handheld telephone is compact, robust and uses less power than previous models

Multimedia

Clemens Hauber
Kurt Distler
Ruediger Hnyk — **Streamlined design** 4/
SMAC project shows European car companies the benefits of multimedia collaborative working

Jan Bellerman, Michael Kein, Lother Stoll — **Cable TV – the multimedia messenger?** 4/30
Advances in cable television networks clear the way for multimedia services

Network management, planning, and design

Nina Gerner — **One-stop shopping for TMN and IN** 1/13
Siemens consolidates TMN and IN activities into one business unit

Peter Bocker — **Standard-bearers** 3/9
Standardization - a major factor in telecommunications business strategies

Klaus Jung — **Network management made easy** 3/46
Hicom network manager has become more flexible and easy-to-use

PBX applications

Ilkka Porkka — **Getting office services under one roof** 1/15
Ässä Center in Helsinki provides uniform offices – and high-tech Hicom communications services – to all its occupants

Angelika Schrader — **The right choice for Commerzbank** 1/18
German bank achieves big savings through corporate network

Werner Nagel — **Frankfurt Airport flying Hicom** 1/20
Nine Hicom 300 switches form the heart of Frankfurt Airport's network

Matthias Nolden — **Power to the desktop** 1/45
ComManager streamlines work in the office setting

Interview with Dr. Dietrich Botsch — **Gateways to the multimedia world** 4/4
Head of Siemens Private Communication Systems Group talks about solutions for the changing market

Private communication systems

Ilkka Porkka — **Getting office services under one roof** 1/15
Ässä Center in Helsinki provides uniform offices – and high-tech Hicom communications services – to all its occupants

Angelika Schrader — **The right choice for Commerzbank** 1/18
German bank achieves big savings through corporate network

Werner Nagel — **Frankfurt Airport flying Hicom** 1/20
Nine Hicom 300 switches form the heart of Frankfurt Airport's network

Holger Seedorf — **Getting the word out** 1/22
Digital alarm and conference server (DAKS) helps Berlin transit authority dispatch urgent messages quickly and reliably

Doris Strobl — **The small switch that thinks big** 1/43
Hicom 150 E can be easily adapted and grows to meet the switching needs of small- and medium-sized businesses

Matthias Nolden — **Power to the desktop** 1/45
ComManager streamlines work in the office setting

Klaus Rosenthal — **Making sense of multimedia** 2/8
Weighing the benefits of multimedia applications for businesses

Anton Hasholzner — **Latin American outlook: achieving long-term growth** 2/10
Siemens' presence as telecommunications vendor plays role in economic success

Interview with Wolfgáng Gemmel — **Staking a claim** 2/12
Building upon a strong foundation in Latin America

Focus on Brazil, Paraguay, Bolivia — **"Major presence in the market"** 2/14

J. Roberto Ortense — **Brazil's award-winning Hicom** 2/18
World's largest Hicom 300 system supports São Paulo office complex

Focus on Argentina, Chile, Uruguay — **"Company tradition since 1857"** 2/19

Focus on Colombia, Venezuela, Ecuador, Peru — **"Process of deregulation and privatization"** 2/24

Focus on Central America and Mexico — **"A bridge between North and South America"** 2/29

Eduardo Santin — **ISDN olé !** 2/30
SmithKline Beecham builds first ISDN link between US and Mexico using Hicom

Pictorial — **CeBIT '96 revisited** 2/32

Christian Teickner — **Network results for Linotype-Hell** 2/40
Corporate network from Siemens helps the company improve efficiency and cut communications costs

Alfred Jahn — **Keeping flexible** 2/42
Hicom cordless telephones allow flexibility and offer a host of features

Joern Schuett — **Switching to personal communications** 2/44
Combined switching center lets users take advantage of both mobile and wireline systems

Peter Giese, Bernd Sommer — **On the record** 2/46
Siemens DataVoice System provides tamper-proof recordings of commercial telephone transactions

Peter Berwing — **DECT poised for the public network** 3/4
The specification and implementation of the new uniform multi-vendor DECT air interface has been given crucial support by Siemens

Don Butters — **Gates Rubber stretches around the world** 3/15
Siemens telecommunications provide reliable global building blocks

Juergen Kempter, Rudolf Lackermeier — **Burda's two-step communications solution** 3/17
Corporate network from Siemens is helping the media powerhouse speed communications while cutting costs

Torsten Laszig — **Minolta: Communications worth copying** 3/20
Modern communications lightens the load at Minolta's European headquarters

Mary Lisbeth D'Amico — **Hong Kong Hicom** 3/22
Hong Kong's new airport will use Siemens Hicom 300 to meet its staggering communication needs

Gary Paris — **The next generation call center** 4/9
RésuméRouting creates virtual groups on a call-by-call basis

Don Butters — **"Making it easier to do business with IBM"** 4/12
New Siemens networks help IBM Europe improve reponsiveness to customer inquiries

Don Butters — **Trading on Wall Street** 4/14
Sherwood Securities overcomes a communications logjam with a Hicom Trading System

Bruce Smith — **Shimano puts customer service in high gear** 4/16
The bike and fishing components company uses computer-telephony integration from Siemens to offer superior customer service

Tomáš Rutrle — **Hicom balances the books** 4/18
With a Hicom-based ISDN communications network, the Czech Ministry of Finance is improving its contacts with the public while boosting tax revenues

Gerhard Lechner — **Mobilizing customers** 3/26
Siemens Programs and Systems Engineering Group specializes in advising small clients on GSM

Jane Ballek
David Huck — **"The freeway's in place"** 4/24
SDH link brings high-speed transmission technologies to Australia

Trends in telecommunications

Rainer Haendel — **Europe and the information society** 1/10
A reality or merely a catch phrase in the battle of visions?

Heinrich Armbruester — **The challenge of video and multimedia to public networks** 1/30
Diversifying applications will increase demands on network solutions

Andreas Vogel — **Tailor-made solutions for global success** 2/5
Siemens gives global network operators a crucial competitive edge

Klaus Rosenthal — **Making sense of multimedia** 2/8
Weighing the benefits of multimedia applications for businesses

Anton Hasholzner — **Latin American outlook: achieving long-term growth** 2/10
Siemens' presence as telecommunications vendor plays role in economic success

Interview with Wolfgang Gemmel — **Staking a claim** 2/12
Building upon a strong foundation in Latin America

Pictorial — **CeBIT '96 revisited** 2/32

Terry Jennings — **The path to local number portability** 2/52
A prerequisite for successful deregulation of local telecommunications service

Peter Berwing — **DECT poised for the public network** 3/4
The specification and implementation of the new uniform multi-vendor DECT air interface has been given crucial support by Siemens

Frank V. Dougherty — **If you can't come to us...** 3/24
Florida Atlantic University's distance learning program moves higher education toward the 21st century

Peter Bruckboeck
Helmut Stocker
John Ash — **SDH - step by STEP** 3/38
Siemens, GPT and Italtel map out a strategy for SDH network evolution

Larry Schessel — **What's next on the Internet?** 4/6
Siemens strategy for Internet evolution

Klaus Rosenthal — **Toward an integrated communications center** 5/6
Future communications systems must link heterogenous technologies in an open system
